Remote Control XAC 4003

» Lithium battery
» Robust and modern design;
» 3 buttons.

The setup of this remote control depends directly on the product with which it will be used. In some products, the remote control pairing is done through programming (command), while in other cases, it is done by pressing a button on the board. In both scenarios, after performing any type of command on the device where the remote will be used, it will be necessary to press the button on the remote control that you wish to register.

Technical specifications

Activation	3 independent buttons
RF Range	100 m without obstacles
Frequency	433,92 MHz
Transmission Rate	1,886 Kbps
Modulation	OOK (Unsupervised) / FSK (Supervised)
Power Supply	3V DC lithium battery CR2032
Encoder	HT 6P20 (fixed code)
Weight	19g
Consumption	300nA (stand by)
Color	Black
Signal LED	Red
Dimensions (W x H x D)	30 x 55 x 12 mm
