

which is an integral part of this Term throughout the country. This contractual warranty implicates in the free substitution of the parts, pieces and components that have production defects, besides the labor used in that repair. If there is no production defect verified, but defects from incorrect use, the consumer will pay for these expenses.

2 When the defect is verified, the Consumer should immediately communicate with the closest Authorized Service Center which is in the list supplied by the manufacturer - **only these are authorized to examine and to repair the defect during the guarantee period here foreseen.** If this is not respected **this warranty will lose its validity**, because the product will have been violated.

3 In the eventuality that the Consumer requests a home visit he should contact the nearest service center to verify the cost of a technical visit. If it is necessary to remove the product, the resulting expenses, transportation and insurance of the product are under the responsibility of the consumer.

Product functions

T/P key: selects the telephone signaling mode: multifrequency (T) or decadic (P).

Factory signaling mode: multifrequency (unavailable in model TC 20).

Ring volume:

Premium: H (high) and L (low).

Gôndola and TC 20:  (high),  (low) and  (mute).

TC 500 and Intelbras Pleno:  (high),  (medium) and  (low).

Ring type: selects ring type  (available only in model Intelbras Pleno).

Mute: keep this key pressed to avoid that the person on the other side of the line hears you (unavailable in model Gôndola).

Redial: redials the last number called

(maximum 32 digits).

Flash/r: used to access services provided by the Telephone Company or PABX. Flash time: see product tag.

Pause: adds a pause during the dialing (not available in models Gôndola TC 20 and Intelbras Pleno).

Mode/Tone: selects dialing tone, temporarily from decadic to multifrequency (unavailable in models TC 20 and Intelbras Pleno).

*** and #:** used to access services provided by the Telephone Company or PABX (multifrequency signaling mode).

Resting pin: if your telephone set is wall mounted and a call is placed on hold, this feature will allow the handset to rest in

vertical position without disconnecting the call (unavailable in model TC 20).

Model with key (optional): locks the keypad (unavailable in models Gôndola and TC 20).

PABX key: selects audio mode between public line and PABX. Clients who have a telephonic central (PABX) connected to the telephone set, should set the key to PABX mode for optimal audio comfort.

Do not expose the telephone set to excessive heat or humidity.

We suggest installing your telephone set on anti-slipping surfaces.

Use only a soft wet cloth for cleaning.
